What is your community's #1 priority for addressing heroin and opioid addiction?

Answered: 2 Skipped: 0

What is your community's #2 priority for addressing heroin and opioid addiction?

Answered: 2 Skipped: 0

From Stephanie Allen, Alaska Wellness Coalition:

Regarding the survey, I feel that we need to have a comprehensive approach that involves all the things you listed. In my opinion, one item doesn't take priority over the others.

The things that rise to the top for me personally are:

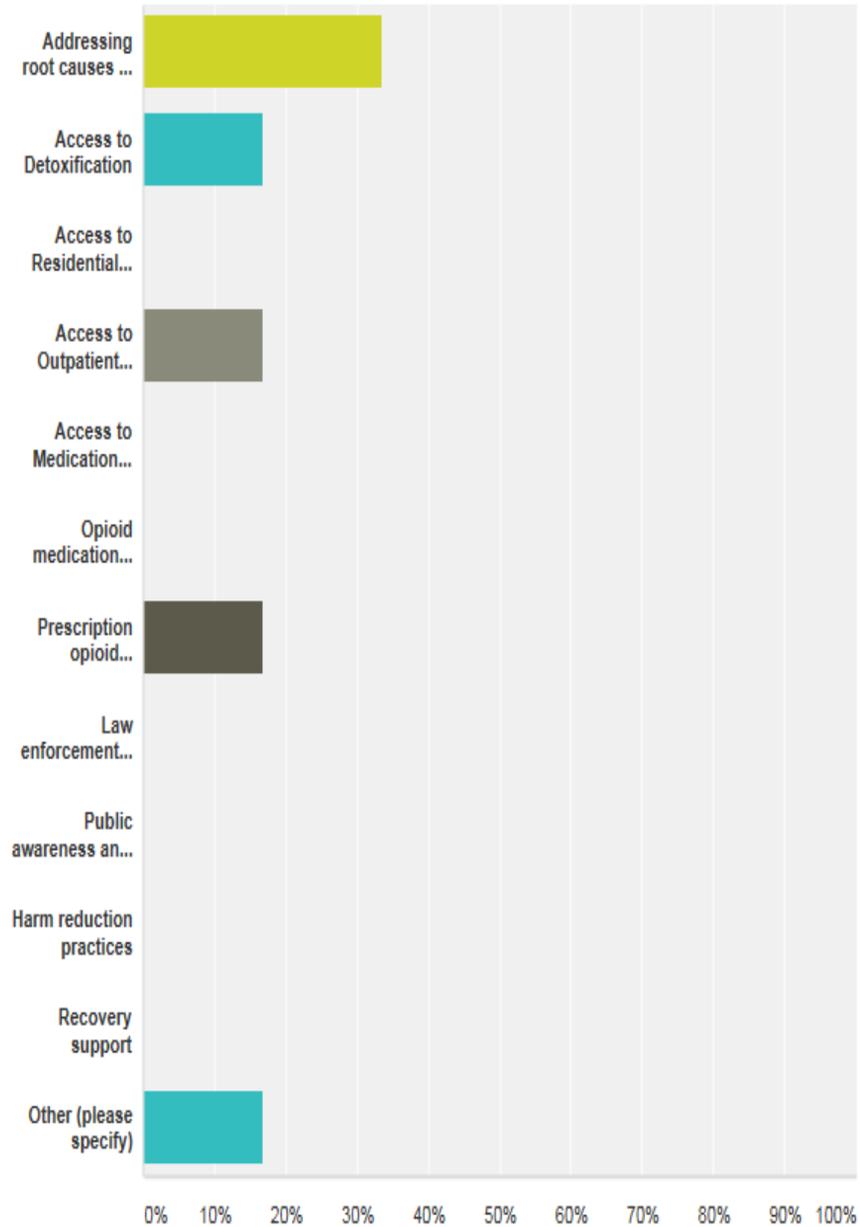

1. Supply reduction & diversion control
 - Dispensing policy modification (limits on amounts/required check of ED admissions)
 - Prescriber education
 - Monitoring & epidemiological surveillance
2. Increased use of rescue medication
 - Naloxone
 - Trainings
 - Funding for Naloxone programs
 - Overdose Reversal tracking data
3. Intervention & Treatment
 - Mobile services
 - Street Outreach
 - Detox (Social, Ambulatory, MAT)
 - Identification and Intervention of super users
4. Harm Reduction
5. Holistic Chronic Pain Management
6. Access/Price
7. Community Knowledge & Activation
8. Emphasis on Hope & Recovery
